

Contract Lifecycle Management

Get Complete Control of the Entire Contract Lifecycle with Technology That Works for You

Onit's Contract Lifecycle Management (CLM) software product empowers legal, sales, procurement, and other business teams with end-to-end automation of their entire contract management process. Onit CLM is a cloud-based contracts repository with automated functionality that supports all phases of the contract lifecycle from capture and creation, through negotiations and approvals, to execution and post-execution management. Onit CLM streamlines the entire contract lifecycle and provides ease of use for all parties involved while reducing risk in the process. With the ability to have unlimited users and an intuitive, user-friendly interface, Onit CLM dramatically improves supplier and vendor relationships as well as overall customer satisfaction. Time to gain control of your contracts, and your companies risk.

Contract Lifecycle Management

Features

Onit takes an innovative approach to CLM with full lifecycle management capabilities to manage all contracts in an enterprise, be they buy-side, sell-side, or corporate contracts.

- **Conditional Contract Generation:** Automatically generate a contract with appropriate clauses based on a robust rules engine and contract metadata.
- **Microsoft Word Integration:** Empower users to work on contracts within their preferred word processing tool, while maintaining a seamless and secure link to Onit CLM.
- **Clause/Template Library:** Manage and maintain contract clauses and templates in a centralized and secure cloud-based location.
- **Obligation Management:** Give your users the power to manage and measure tasks or milestones related to compliance.
- **AI Driven Automated Risk Mitigation:** Identify clauses and terms which add risk to your agreement and score your contract repository to assist you in both negotiations and renegotiations.
- **AI Powered Data Extraction:** Use artificial intelligence to simplify and speed up contract data extraction.
- **Partner and Client Self-Service:** Provide partners and clients an easy to use portal to request, submit, or create contracts.
- **Document Management:** Empower users with automatic version control as well as simple and easy to use check-in, check out functionality.
- **Routing and Approval Workflow:** Utilize Onit's robust Aptitude business automation platform to design and build simple to complex workflows to generate and route your contracts.
- **Secure Collaboration:** Allow secure collaboration between not only your employees but also third parties to reduce risk and ensure compliance.
- **eSignature Integrations:** Seamlessly integrate DocuSign and Adobe Sign signatures as part of your Onit contract management workflow.
- **AI Enabled Reviews:** Use artificial intelligence to quickly draft, review, redline, and edit all types of contracts according to your company's best practices.

Maximize Performance with Cloud-based CLM

With the world's most advanced cloud platform, Amazon AWS, Onit CLM can be deployed in 30 days or less, providing companies with maximum performance, reliability, and scalability. Accessible on all major web browsers and mobile devices, companies can access their business-critical contract information anytime, anywhere.

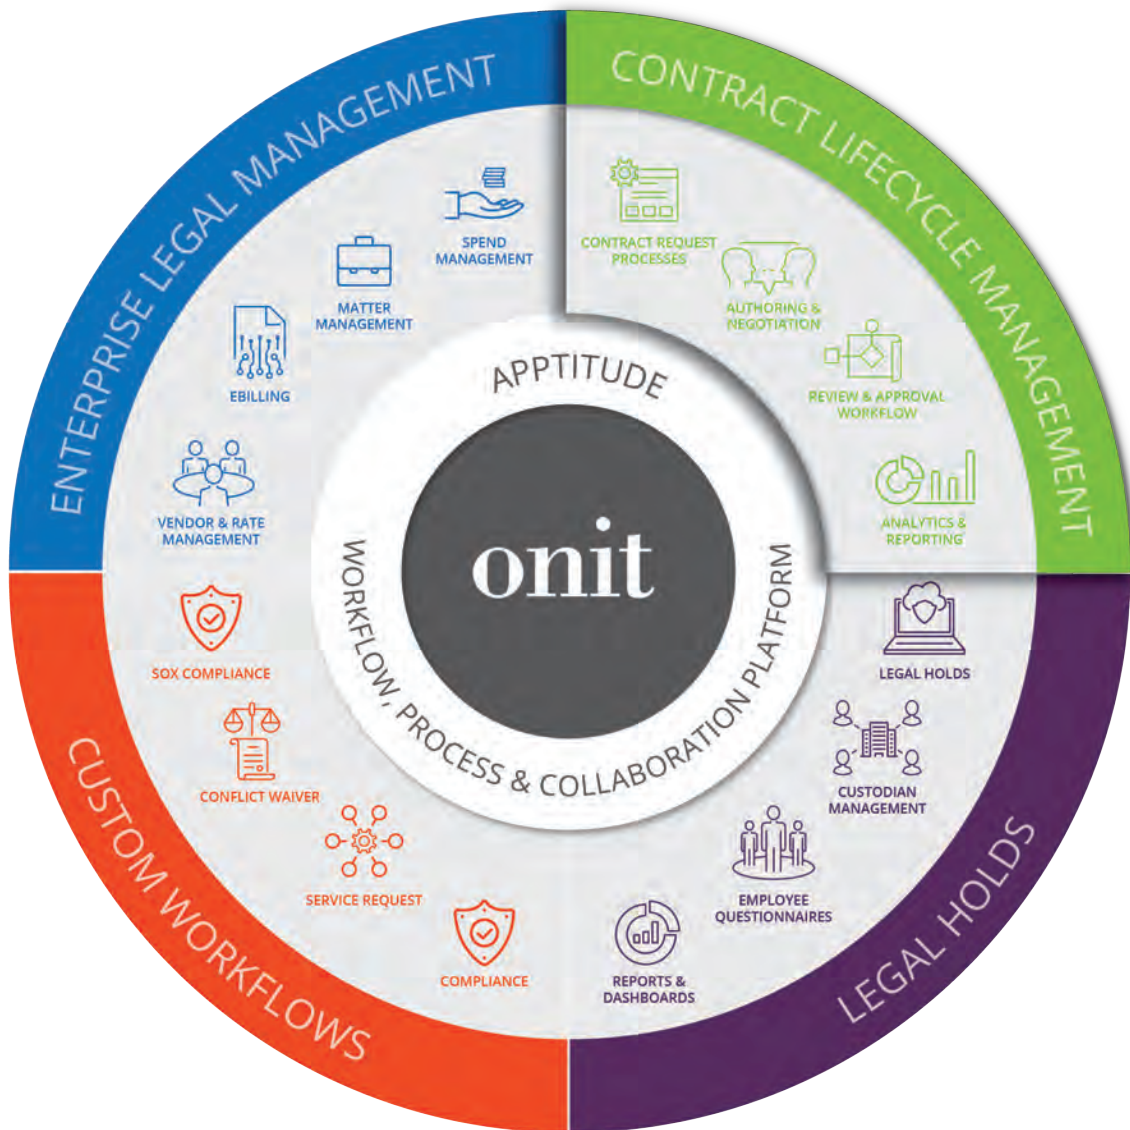

“These tools can help legal teams get ahead of the game by simplifying approval workflows, enhancing their visibility into the contracting process, mitigating business risk and improving the organization's contracting posture, all the while adding greater value to the business.”

- Consilio

Contract Lifecycle Management

The Power of the Platform

Contract Lifecycle Management is built on Onit's flexible and robust Aptitude platform, an innovative workflow process automation engine that makes it easy to create, modify, and deploy new solutions with powerful workflows, transaction management, and reporting capabilities. Aptitude empowers you to solve real business problems fast, without the need for costly IT infrastructure.
