

Enterprise Legal Management

Onit's Enterprise Legal Management (ELM) solution automates the logistics of managing a legal department's workflows, increasing your department's efficiency and enabling transparency into your legal matters and spend. ELM automates and optimizes processes such as matter management, billing, invoice review, and spend and vendor management. Workflow capabilities match your business needs, and our solution provides a single, secure platform for all of your communications. Onit's ELM solution makes the job of legal ops easier, and lets you focus on what you do best – identifying and mitigating risk.

Key Capabilities

Highly configurable to mesh with your business processes and needs.

Full audit trail for all matters.

Enables transparency into all of your matters and spend, including invoices at every stage; spend to budget and by area of law, business unit, and law firm; matter workload within your department; hourly rates and staffing; and matter outcomes.

Reporting and dashboard views to quickly analyze invoices, evaluate performance against budget, manage risk, show value to stakeholders through KPIs, and identify trends.

Full text search across all your data and documents.

Integrate with AP systems, reporting, and existing software

Reduce overall spend up to

43%

Reduce Legal Ops's expenses up to

5%

Save on outside counsel spend by

20%

“Onit's Enterprise Legal Management solution facilitates engagement, is focused on process, offers an environment where the user experience is crucial and empowers a better way to work. It was differently organized than other legal e-billing and matter management systems we had seen, and we really liked it because all of the information was at our fingertips. And in today's highly connected world, where information is spread across devices and in the cloud, that is more important than ever.”

- Jaguar Land Rover

Enterprise Legal Management

Benefits

Build connections. Connect your legal ops to other parts of your enterprise. Connect quickly and seamlessly with your internal clients to drive business growth.

Increase operational efficiencies and reduce costs. Save up to 5% in productivity costs and up to 20% in outside counsel costs.

Gain insight. Aggregated data enables actionable, measurable, impactful insights.

Mitigate risk. Proactively protect revenue, profits, and reputation.

Get clarity. Manage budgets, timekeeper rates, accruals, matters, and documents in one place.
